

SUJIT MAITY

Defence Research and Development Laboratory (DRDL), DRDO

📍 Hyderabad ✉️ maitysujit32@gmail.com ☎️ (+91) 9547364562 🔗 [sujit-maity-8a3123207](#)

SUMMARY

Software Engineer with **4+ years of experience** in software development, testing, , checkout software operation and MIL-STD-1553 data analysis, telemetry software operation, digital, analog, discreat data extraction and analysis. Hands-on experience in Python, desktop application development, data processing, visualization, and communication . Experienced in software verification and validation activities.

EDUCATION

B.Tech in Computer Science Engineering

Birbhum Institute of Engineering and Technology

📅 2018 – 2022

📍 CGPA: 8.43/10

Higher Secondary Education

Ghoshpur High School (H.S)

📅 2016 – 2018

📍 Percentage: 75.2

SKILLS

- **Programming Languages:** C, Python, MATLAB
- **Web Technologies:** HTML, CSS
- **Operating Systems:** RHEL, Linux, Windows
- **Protocols & Format:** Ethernet, MIL-STD-1553, CH10 (Throughput mode and Packed mode)
- **Testing & Analysis:** Software Testing, Static Analysis
- **Tools:** Visual Studio, Wireshark, Coverity

EXPERIENCE

Software IV&V Engineer

GVR Technolabs Pvt. Ltd.

📅 August 2025 – Present

- Operate and support hardware checkout software for system-level testing, monitoring, data acquisition, and verification activities.
- checkout software operation and various subsystem data plotting and analysis.
- Design, develop, verify, and validate software modules for various aerospace and defense-oriented projects.

Software Engineer

M/S Sri Rama Security

📅 April 2025 – July 2025

- Developed applications for telemetry data analysis and processing.
- Building test cases and testing the developed module and deployment of the application.
- Optimized load management and operational efficiency, minimizing costly emergency repairs while enhancing safety and compliance.

Software Engineer

Maple Software Pvt Ltd.

📅 June 2023 – March 2025

- Designed and developed GUI applications for telemetry data analysis.
- Developed Telemetry Data Extraction software.

- Data Plotting and Visualization using MATLAB of data from Unmanned Launch Vehicles.
 - Performed extraction and processing of Analog, Digital, and Discrete telemetry data.
-

Project Engineer

Defence Research and Development Laboratory (DRDL)

📅 August 2022 – May 2023

- Operating Telemetry system to collect data from launch vehicle and Data Extraction.
- Developed Telemetry Data Extraction software.

PROJECTS

UDP Packet Sniffer Application

Python, PyQt5, Scapy

📅 2026

- Developed a GUI-based application for real-time UDP packet monitoring.
 - Captured and analyzed UDP packets along with system events in real time.
 - logging and visualization features for tracking communication status .
-

Receiver Application

Python, PyQt5, Json, UDP Sockets, Pyplot

📅 2024

- Developed and designed a receiver application for DUM configuration data to board.
 - Implemented RF and spectrum data acquisition, real-time monitoring of received signal parameters.
-

TMOIP Data Bridge Application

Python, PyQt5, UDP Sockets

📅 2024

- Developed a desktop-based application that receives data in Throughput and Packet mode data processes it in real time, and transmits the formatted output over Ethernet via UDP using the TMOIP protocol.
-

Telemetry Data Analysis Application

Python , PyQt5, Matplotlib, MATLAB

📅 2023

- Designed and developed an application for offline telemetry data analysis, and Plotting.
