Summary

Software Engineer with **4 years of experience** in software development, testing, telemetry systems, hardware checkout, data extraction and analysis, and engineering software applications. Hands-on experience in C/C++, Python, Telemetry, MIL-STD-1553, GUI development, data processing, visualization, and communication interfaces. Experienced in software verification and validation activities aligned with DO-178B/C standards.

Education

Birbhum Institute of Engineering and Technology (BIET)

2018 - 2022

B Tech in Computer Science Engineering(CSE)

CGPA: 8.43/10

Ghoshpur High School (H.S)

2016 - 2018

Higher Secondary Education

Percentage: 75.2

Kumarpur Hateswar High School

2015 - 2016

Secondary Education

Percentage: 54.57

Technical Skills

- **Programming Languages:** C, Python, MATLAB
- **Operating Systems:** Linux, Windows
- **Protocols & Buses:** MIL-STD-1553, Ethernet
- **Web Technologies:** HTML, CSS
- **Testing & Analysis:** Software Testing, Unit/Integration Testing, HIL/SIL, Static Analysis
- **Tools:** Visual Studio, Wireshark

Experience

GVR Technolabs Pvt Ltd

August 2025 – Present

Software IV&V Engineer

- Designing, developing, validating, and verifying software in C/C++ according to DO-178B/C standards for various articles and projects.
- Operating checkout software for system-level hardware testing, verification, monitoring, and data acquisition.
- Extracting, processing, and analysing MIL-STD-1553 telemetry data for system testing and engineering analysis.
- Developing software applications and GUI-based tools for data analysis, processing, visualization, and engineering applications.
- Working with communication interfaces including **Ethernet** for system integration and data communication.
- Performing software testing, debugging, verification, and validation activities.

M/S Sri Rama Security

April 2025 – July 2025

Software Engineer

- Operated Telemetry systems to collect and monitor data from launch vehicles.
- Performed data extraction and analysis of Analog, Digital, and Discrete telemetry data.
- Developed applications for telemetry data analysis and processing using C and Python.
- Designed and developed GUI applications for telemetry data analysis and visualization.

Maple Software Pvt Ltd

May 2023 – March 2025

Software Engineer

- Operated Telemetry systems for data acquisition and monitoring of launch vehicle data.
- Performed extraction and processing of Analog, Digital, and Discrete telemetry data.
- Developed applications for telemetry data analysis and processing using C and Python.
- Designed and developed GUI applications for telemetry data analysis and visualization.

Defence Research & Development Laboratory (DRDL)

August 2025 – Present

Project Engineer

- Operated Telemetry systems for collecting and monitoring launch vehicle data.
- Performed data plotting and visualization of Unmanned Launch Vehicle data using MATLAB.

Projects

UDP Packet Sniffer Application

2026

Python / PyQt5 / Scapy

- Developed a GUI-based application for UDP packet monitoring and network analysis.
- Captured and analysed UDP traffic between network devices.
- Implemented packet inspection, payload analysis, and directional traffic monitoring features.

TMOIP DataBridge Application <i>Python / PyQt5 / UDP</i> Developed a desktop-based application that receives data in Throughput and Packet modes, processes them in realtime, and transmits the formatted output over Ethernet via UDP using the TMOIP protocol.	2024
Telemetry Data Analysis Application <i>Python / PyQt5 / Matplotlib</i> - Designed and developed an application for telemetry offline data processing, analysis, and Plot. - Supported analysis of Analog, Digital, and Discrete telemetry parameters.	2023
MIL-STD-1553 Data Extraction and Analysis <i>C / Python</i> Developed software for extracting and processing MIL-STD-1553 bus data.	2023
Certification Python Basics - DataFlair	2022
